Press Release

Technidyne Certifies Chemical House for Enhanced Asian Service

Local Asian Service Support Improved

New Albany, IN, April 10, 2009: Technidyne Corporation, New Albany, IN, USA announced that Mr. Jakkapan Chanitnun of Chemical House & Lab Instrument Co., Ltd., Bangkok, Thailand, is the very first technician outside the U.S. and Canada to be certified thru Technidyne's new Authorized Service Technician Training Program. Technidyne's Asian Business Director, Mr. Paul Crawford said, "All Technidyne service representatives around the world receive training. However, this new level of certification is much more rigorous. In addition to several field training sessions, the most intense training occurred over a 4 week course at Technidyne that included both a written exam and practical hands-on repair exam on all PROFILE/Plus instruments, Color Touch 2, Color Touch PC and the T480A. This will allow us to provide a higher level of local support to customers throughout Asia."

Chemical House has been an exclusive sales and service representative for Technidyne's line of paper testing equipment for over 10 years. Chemical House can provide Technidyne Representatives and customers throughout Asia with local 24-hour customer support, instrument repair, parts sales and preventative maintenance. "They will be a greater resource for our other representatives throughout Asia", added Mr. Crawford. All of this can now be done by a certified technician. Mr. Mike Conlon, Technidyne's European Business Director said, "Similar certification will be sought by members of Technidyne's Belgian representative, Rycobel NV, to provide the same kind of enhanced local support throughout Europe."

Technidyne Corporation, New Albany, Indiana, USA is a world leader in providing quality control equipment to the Paper Industry. Founded in 1974, the company specializes in laboratory test equipment including the automated paper test system, PROFILE/Plus™, and color spectrophotometer, Color Touch™. Since its first international shipment to Spain in 1979, Technidyne has shipped products into 55 countries outside of the United States. A sister company, Technidyne Inc. in Canada and a network of independent sales and service agents and distributors in over 30 other countries assist Technidyne in providing equipment to the worldwide Paper Industry.
